

REDESIGNING WORKFLOWS THROUGH TECHNOLOGY TRANSITIONS

Redesigning Workflows through Technology Transitions:

Congratulations! Your company has taken the time and energy to vet new technology for your staffing business, and you have made the commitment to implement the new technology. Now the fun begins! In this fast-paced and interactive session, the SVP team will outline best practices in redesigning your workflows to take advantage of the power and capabilities of your new technology. This session will be particularly beneficial for those who are planning a transition to Avionté Bold. The SVP consultants have worked with many Avionté clients who have made the Bold transition and will share their insights for success.

Purpose:

- “Clean Slate” opportunity when you are making a technology transition
- Best practices in evaluating your current state and the manual process, pinch points and bottle necks that are holding your enterprise back
 - Replace non-integrated processes
 - Remove the swivel chair of logging into different systems
- Redesigning workflows to leverage the technology upgrade to Avionté Bold to your desired future state

Take home notes:

- Remove manual processes
- Eliminate paper and inefficient processes
- Automate and digitize entire workflow!
- Minimize the steps in each process
- Embrace the mobile revolution
- Use the power of AviontéBOLD partner integrations
- Tap into the Business Intelligence and include automatic delivery of critical reports in your workflow
- Cultivate consistent processes (workflows) throughout your organization to facilitate quality and growth
- Use the power of your entire organization in this endeavor!
